

Special motors - Range MTC-MTCF / MTA-MTAF

Manufactured for intensive use in on-board applications (marine, railway...), these products can be provided with approval certificates from all the main classification companies (B.V, D.N.V, L.R, etc).

They can also be used in wet and aggressive environment for industrial applications.

On request, we manufacture specific machines according to customer specifications : (winch, capstan, windlass, davit, ventilating, pump, propulsion, etc...)

- Fail-safe brake 1.5Cn - 2Cn - 2.5Cn – with manual release system
- Encoder
- Protection factor for motor + brake IP 56, 66, 68
- Reheating
- Anti-slip
- Winding thermal protection sensor
- Underwater housing

Main characteristics

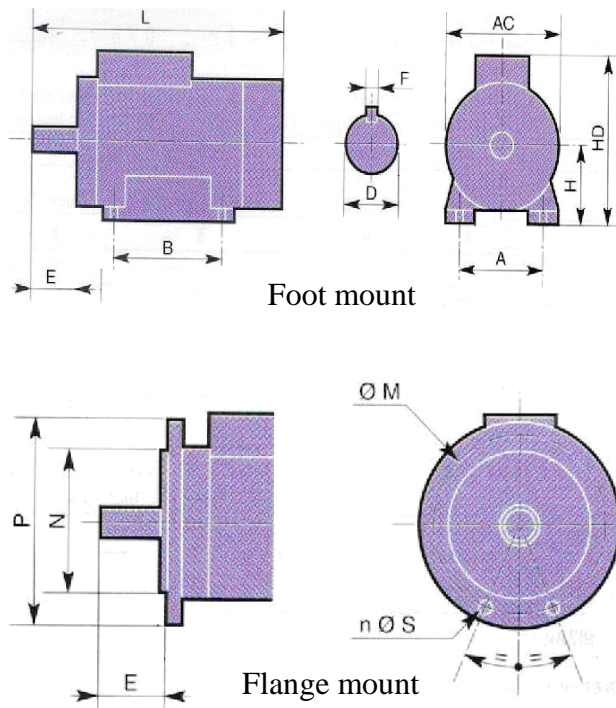

- AC or DC motors, monoblock cast iron, stainless steel housings
- Cast iron bearings, large terminal box
- Supply voltages : 230Vac to 690Vac
24Vdc – 12Vdc – 48Vdc – 72Vdc
- Frequency : 50Hz-60Hz
- Speed : 3000 - 1500 - 1000 – 750rpm
- Power range :
0.37 to 400 Kw for AC motors
0.25kw to 2.2Kw for DC motors
- Marine and tropicalised impregnation
- Protection IP55 - 56 - 68 of the motor + brake
- Mechanical adaptations : flange, specific shaft end
- The rotors are dynamically balanced
- The bearings are lubricated with lithium grease.
The motors from 0.37kw to 55kw are equipped with bearings which are permanently greased.
- Magnetic circuit with low losses

* Many other options available on request (voltage, power form, size...)

Special motors - Range MTC-MTCF / MTA-MTAF

Standard dimensions

Power in function of the shaft height and speed

Shaft height	1000 rpm	1500 rpm	3000 rpm
71	0.18 - 0.25	0.25 - 0.37	0.37 - 0.55
80	0.37 - 0.55	0.55 - 0.75	0.75 - 1.1
