

Touch screen display for backup power supply AC/DC ADM-SB

This colour LCD Display with touch screen is an option for the new range of DC backup power supplies.

With its large size (3.5") and its touch screen, this HMI is a very user friendly interface. You can access the main parameters and the status of the equipment. In case of defect, visual and audible alarms are triggered.

Main technical characteristics:

Display:

- the charger voltage
- the battery voltage
- the output current
- the battery current
- the ambient temperature close to the battery
- the functional status
- the operating history

Command set:

- Selection of values to be displayed
- Scrolling of the list of defects
- Shut down of buzzer
- Setup of alarm thresholds
- Start of battery test
- Reset to manufacturing parameters

Alarm :

- Visual & buzzer

Mechanical dimensions:

- WxH : 70mm x 53mm
