Application/Limitation

EMC Class A.

Type Approval documentation

Tests carried out

EMC, Dry heat & Vibration in according to DNVGL-CG-0339 Class A, Humidity/ Damp heat in accordance DNVGL-CG-0339 Class B. Type tests in accordance with IEC 60335-2-29.

Marking of product

ENAG – charger model no. 12 or 24/xxx – charger input – charger output.

Periodical assessment

The scope of the periodical assessment is to verify that the conditions stipulated for the Type approval is complied with and that no alterations are made to the product design or choice of materials.

The main elements of the periodical assessment are:

- Inspection on factory samples, selected at random from the production line (where practicable)
- Results from Routine tests (RT) checked (if not available, tests according RT to be carried out)
- Review of type approval documentation
- Review of possible change in design, materials and performance
- Ensuring traceability between manufacturer's product type marking and Type Approval Certificate.Periodical assessment to be performed at 2 and 3.5 year and at renewal.
